**Thyrobot AI**

*On the occasion of World Thyroid Day 2025, we are proud to announce the launch of

"Thyrobot AI" — India's first Hindi-language AI chatbot for thyroid awareness and patient education.*

Launched today by Prof. Anjali Mishra (President, IAES), Prof. Pooja Ramakant (Secretary, IAES), Dr. Pushparaj Bhatele (Secretary, IMA MP State Branch),Dean, Superintendent, Head of Surgery Department,  and other dignitaries, this initiative is a major leap toward accessible, evidence-based, and language-appropriate health information for patients across North and Central India.

*Key Highlights:*

* Provides scientifically accurate, Hindi-language information on thyroid diseases, nodules, and cancers.
* Powered by guidelines from the *American Thyroid Association*
* Designed to address myths, misconceptions, and improve health-seeking behavior.
* Fully functional on mobile devices for ease of use by patients, ASHA workers, and primary care physicians.

This AI tool has been conceptualized and deployed by us, the highest-volume advanced care center in Central India

*We are committed to empowering patients and primary care providers with reliable knowledge, accessible in the language they understand best.*

*Try Thyrobot AI here:*
